

Hyderabad Flex User Group

Meeting Details

Using Advance Skinning

Meeting Description : One of the main themes for the Flex 4 (codename: Gumbo) release is "Design in Mind", and skinning is a big part of that theme. Flash Player is the delivery mechanism for some of the most creative work to be found on the web today. However, Flex applications have gained a reputation for looking too similar to each other, as many developers choose to use the Flex default look and feel (known as Halo) as opposed to applying extensive styling or skinning.

 **Meeting Date :** 14-Dec-2011

 **Starts At :** 09:30 AM **Ends At :** 11:30 AM
